

German Alu Taper Tool – professional tool part number: 502

Inhalt:

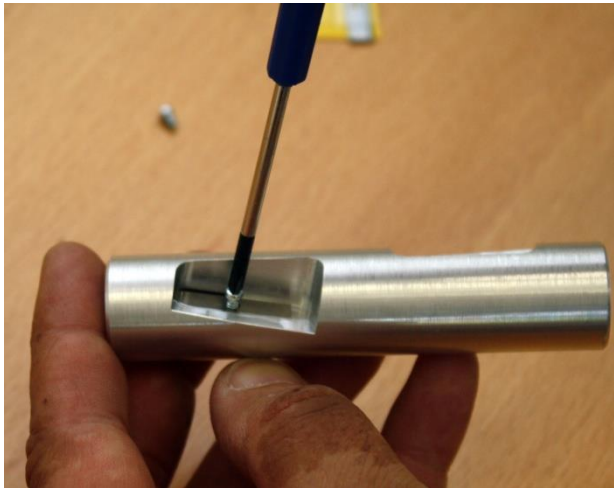

- 1x German Alu Taper Tool
- 1x "sleeves" for German Alu Taper Tool
- 2x self-tapping screws, screw thread is formed by itself
- 2x blades for Alu Taper Tool

Carefully take out one of the blades (Warning! Risk of injury) and place into the blade mountings containing the drilling.

Turn the screw into the bore until it is tightly fixed.

Repeat this action for the second blade.

As soon as both blades have been fixed tightly, the sleeve can be attached to one end of the Taper Tool.

Slide the shaft into it to form a tip respectively bearpaw nock.
